SUMMARY

Full-stack developer and mobile app team lead with 5+ years of experience building scalable web and mobile applications, RESTful APIs, real-time systems, and AI agent systems. Expertise in Laravel, Node.js, Express.js, NestJS, React.js, TypeScript, and Flutter. Currently leading a 5-person Flutter team shipping production mobile apps. Delivered enterprise solutions processing 25,000+ monthly transactions and serving 10,000+ users.

TECHNICAL SKILLS

- **Backend:** Laravel (v5–13), Node.js, Express.js, NestJS, REST API Development, OAuth2, JWT
- **Frontend:** React.js, Vue.js, Inertia.js, Livewire, Alpine.js, TypeScript, JavaScript, Tailwind CSS
- **Mobile:** Flutter, Dart
- **AI Engineering:** AI Agents, Agentic Workflows, LLM Integration (Claude, GPT), Prompt Engineering, AI-Assisted Development (Claude Code, Cursor, GitHub Copilot)
- **Databases & Real-Time:** MySQL (Query Optimization), MongoDB, Redis, WebSockets, Socket.IO
- **DevOps:** AWS (EC2, S3, RDS), Docker, Git, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Mobile App Team Lead, SATA Technologies (Pvt.) Ltd, Gilgit Aug 2026 – Present

- Lead a team of 5 Flutter developers building cross-platform mobile apps
- Built and shipped Sikka, a digital khata and billing app now live on the Google Play Store

Web Development Lead, SATA Technologies (Pvt.) Ltd, Gilgit Jun 2026 – Aug 2026

- Led a web development team building production AI agent systems
- Designed agentic architectures covering agent reasoning, coordination, and task orchestration
- Owned full-stack delivery from backend APIs through the AI agent layer

Senior Web Developer, Ripple Minds (Pvt.) Ltd, Karachi Apr 2025 – May 2026

- Architected and developed backend APIs using Node.js and Express.js for high-traffic applications
- Built scalable real-time features and performance optimizations ensuring stability under peak load

Senior Executive Laravel Developer, Sybex Lab (Pvt.) Ltd, Karachi Nov 2023 – Mar 2025

- Developed high-performance real-time Laravel applications on the TALL stack (Tailwind, Alpine.js, Livewire)
- Implemented data pipelines extracting attendance logs from biometric machines into the HR portal
- Built RESTful APIs and Node.js microservices powering scalable enterprise solutions

Project Manager (Part-time), 3Beez Technologies (Pvt.) Ltd, Gilgit Apr 2023 – Jan 2025

- Managed end-to-end delivery of Land Acquisition Management System and Assets Management System for government departments, coordinating cross-functional teams to on-time delivery

Senior Web Developer, SATA Technologies (Pvt.) Ltd, Gilgit Jan 2021 – Jan 2025

- Engineered E-Billing System (billing.wpdgb.gov.pk) processing 25,000+ monthly utility transactions
- Built AGGB Web Portal automating payroll and fund distribution for 10,000+ government employees
- Developed Asset Management System digitizing tracking for the Water and Power Department
- Led deployment and training of Point of Sale System across 30+ retail stores

Student Assistant, Karakoram International University, Gilgit Mar 2023 – Jun 2023

- Developed Learning Management System deployed across 8+ schools (HEC-sponsored project)
- Built the APIs behind its Flutter mobile app; lead trainer for administrators, teachers, and students

Web & Mobile App Designer (Intern), Water & Power Department GB, Gilgit Jan – Jun 2021

- Developed Vendor Management System, live in production on wpdgb.gov.pk
- Built Meter Disconnection App for Android streamlining field operations

FREELANCE PROJECTS

- **quranri.com:** Designed, built, and deployed an AI-integrated Quran learning platform with a custom AI tutor

EDUCATION

Karakoram International University, Gilgit

2018 – 2023

Bachelor of Science in Computer Science
